

LittleLink ID

LittleLink. Big Difference.
Safeguarding that goes wherever you go

LittleLink ID is a professional **safeguarding ID system** created from lived experience and designed to support the safeguarding systems childminders already use every day.

Safeguarding & reassurance

- ✓ Information is parent-provided and parent-verified
- ✓ Up to four emergency contacts per child can be securely linked
- ✓ Medical information is displayed only where appropriate, with parental consent
- ✓ No phone numbers or personal contact details are visible on the ID
- ✓ Data is held within a secure, encrypted system
- ✓ Access is limited to an emergency view only
- ✓ The ID can be disabled immediately if required

Full safeguarding information is available via QR code or on request.

In simple terms

LittleLink ID is about visibility, reassurance and preparedness.

It strengthens the safeguarding chain, supporting what is already in place and giving peace of mind to children, parents and childcare professionals.

What LittleLink ID Does

- Identifies a registered childminder
- Links to parent-verified emergency information
- Supports up to four approved emergency contacts per child
- Shows medical information only when needed and consented
- Protects privacy – no personal data shown publicly
- Can be instantly deactivated if lost or no longer required

Why You May See It Being Worn

Clearly identifies the childminder

Ensures the right info is available

Supports children in an emergency

1 Parent-provided & parent-verified

2 Essential emergency info only

3 Secure, encrypted system

4 Emergency-view access only

What LittleLink ID Does Not Do

- Does not replace safeguarding policies or professional judgement
- Does not show full names or phone numbers
- Does not display personal contact details
- Does not store data on the card or device
